

36/7/4* Attachment Pattern

THE SOLUTION TO YOUR ATTACHMENT NEEDS FOR DGB-36 ROOF DECK

ASC Steel Deck introduces a revolutionary solution for attaching steel deck to supports. The 36/7/4 Attachment Pattern eliminates the overwhelming number of attachment options with a single pattern optimized for all span conditions.

* Patent Pending

36/7/4
Shear Capacity & Flexibility

36/7
Shear Capacity & Flexibility

features | benefits

30% fewer attachments to supports using 36/7/4

- Means reduced installed cost – providing the best installed value using 1½” Deep Roof Deck in the Market

36/7/4 attachment pattern requires fewer shear diaphragm zones to optimize deck

- Results in simpler design
- Reduces potential construction errors
- Contributes to easier inspections

36/7/4 Eliminates the outdated 36/5 attachment pattern

- Reduces the need for multiple design and construction choices

To find out how much you will save on a specific project by using the 36/7/4 attachment method, visit us online at www.ascsd.com, or contact your Sales Representative today at **1-800-726-2727**.
